SUMMARY

Results-driven Software Engineer with 3 years of experience designing scalable distributed systems, RESTful APIs, and full-stack web applications. Proficient in JavaScript, TypeScript, Node.js, and React with hands-on expertise in microservices architecture, blockchain integrations, and SDK development. Demonstrated ability to lead cross-functional engineering teams, deliver measurable performance improvements, and collaborate directly with stakeholders to ship production-ready systems on time.

WORK EXPERIENCE

Senior Software Developer

Feb 2025 – Present

Codetribе Solutions Pvt. Ltd

Mohali, India

- Architected a reusable, plug-and-play microservice integrating SMS, SMTP, and Sentry, eliminating duplicate infrastructure across 3+ independent product teams and cutting integration setup time by 60%.
- Built an end-to-end automated CI/CD deployment pipeline that removed all manual configuration steps, reducing deployment turnaround time from hours to minutes and decreasing release errors by an estimated 40%.
- Conducted weekly client requirement sessions, maintaining 100% on-time feature delivery across all active projects.
- Mentored junior developers on backend design patterns, code quality standards, and Git-based collaboration workflows.

Software Development Engineer

Jul 2023 – Jan 2025

Cybernext Pvt. Ltd

Mohali, India

- Engineered backend systems using Payload CMS, integrating Ethereum and Provenance blockchain networks; implemented blockchain event listeners, transaction indexers, and a subscription-based event processing pipeline handling 100+ daily events.
- Designed and shipped reusable TypeScript SDKs following object-oriented design principles, adopted across CLI tools and internal developer workflows, reducing service integration time by 35%.
- Led a cross-functional team of 5+ engineers through full SDLC — system design, development, code review, QA, and production release — delivering 4 major feature milestones.
- Authored comprehensive API and system documentation using VitePress, improving new engineer onboarding speed and reducing internal support requests.

PROJECTS

Skuchain — Blockchain-Enabled Trade Finance Platform

- Built and deployed RESTful APIs in Node.js/Express supporting blockchain asset transactions, role-based access control, and multi-party trade finance workflows.
- Implemented dynamic account funding mechanisms that improved transaction throughput by 30% and reduced failed transaction rates.
- Designed an AES-based encryption privacy service to enforce secure asset ownership and prevent unauthorized data access.

Pearmed — Healthcare Scheduling & Time Tracking

- Developed a responsive full-stack application with real-time appointment tracking using Socket.IO and MongoDB, reducing scheduling update latency to under 200ms.
- Integrated Firebase Cloud Messaging (FCM) for push notifications, increasing user engagement with appointment alerts by 45%.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++

Frontend: React.js, Next.js, Redux, Tailwind CSS, ShadCN UI, MUI

Backend: Node.js, Express.js, REST APIs, Microservices, Payload CMS

Databases: MongoDB, MySQL, PostgreSQL

DevOps & Tools: AWS, Docker, Git, CI/CD Pipelines, Postman, JIRA, VitePress

Concepts: Distributed Systems, System Design, SDK Development, Object-Oriented Design, Data Structures & Algorithms, Code Review

EDUCATION

Chandigarh University

Mohali, India

Bachelor of Engineering, Computer Science

2020 – 2024

- CGPA: 8.0/10

ACHIEVEMENTS & CERTIFICATIONS

Hardworking Bees Award — Cybernext Pvt. Ltd (recognized for outstanding engineering contributions and delivery)

Soft Skills Excellence Award — Chandigarh University

Certifications: Full-Stack Web Development – Internshala
